-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 6) ☐ Other: _____.

DETAILED ACTION

Drawings

1. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because lines through the figure numbers should not be included and a more formal copy is required. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Specification

2. Applicant is reminded of the proper language and format for an abstract of the disclosure.

3. The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

4. The abstract of the disclosure is objected to because of the length of the Abstract. Correction is required. See MPEP § 608.01(b).

Claim Objections

5. **Claims 6-14** are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should refer to other claims in the alternative only and cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 6-14 have not been further treated on the merits.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. **Claims 1-5** are rejected under 35 U.S.C. 102(b) as being anticipated by Ohkawa (Patent 6,485,157), hereafter referred to as Ohkawa.

8. With respect to claim 1, Ohkawa discloses a light diffusing sheet comprising a light transmitting resin (Column 8, Lines 22-30), characterized by having fine recesses formed in at least one of the surfaces thereof, the fine recesses having a shape which is any of the shape of an inverted polyangular pyramid, the shape of an inverted truncated polyangular pyramid, the shape of an inverted cone, and the shape of an inverted truncated cone (inverted within the back face; Figure 6).

9. Regarding claim 2, Ohkawa discloses a light diffusing sheet, characterized by containing a light diffusing agent (Column 8, Lines 31-39; PET film).

10. In reference to claim 3, Ohkawa discloses a light diffusing sheet (DF) which comprises a core layer (light guide) made of a light-transmitting resin (Column 8, Lines

22-29) and a surface layer laminated to at least one of the surfaces of the core layer and made of a light-transmitting resin containing a light diffusing agent (PET Film; Column 8, Lines 30-39), characterized in that the surface layer has, formed in the surface thereof, fine recesses having a shape which is any of the shape of an inverted polyangular pyramid, the shape of an inverted truncated polyangular pyramid, the shape of an inverted cone, and the shape of an inverted truncated cone (Figure 6).

11. With respect to claim 4, Ohkawa discloses a light-diffusing sheet wherein the core layer contains a light-diffusing agent (Microreflectors, 90).

12. Concerning claim 5, Ohkawa additionally discloses a light-diffusing sheet wherein the recesses have been regularly arranged (Column 12, Lines 3-9).
